

There are those saying.....spreading false information?

There are those who allege Taj Tarik Bey is not affiliated with us. What we can say with certainty is Taj throughout the years, has assisted many in their endeavors. We are also aware that many associated Taj Tarik Bey's choice to support the Consular Courts as if it was R.V. Bey Publications choice to support it as well, because he has been associated with us over many years and that relationship can never be erased. However, R.V. Bey Publications **website** was established behind the desk of RaHSMariah Bey with Sister Anaidah El, being the virtual editor, into days and late nights some years ago. R.V. Bey Publications, as a publication force was established by RaHSMariah Bey even earlier than that, being on the path then, and into now more than 20 years later.

Others have taken the assumed association with R.V. Bey Publications and Consular Courts full-throttle to convince masses that we were / are a party and anyone involved would be "assisting us" - NOT TRUE. Others say it is all about unity and we need to be supportive and united as the Consular Court representatives initially claimed we were. If we were involved as they in fact initially claimed and others assumed, we would know that and would have made it known that we were involved. As they gained notice, they began and currently tell people the opposite, which is **not** to associate with us, not to support us and they say we are taking this whole thing personally with jealousy, envy, and things that harm. We have always worked for the good and collective and have always reserved our right to associate or not (Bill of Right #1). We also always give verifiable, substantiated evidence for our position(s) to the collective as we did with the history chronology and lawful defines of Consular Courts.

We trust this puts a brighter light on all of us amidst the confusion. We trust you will continue to support us even in the recent delays in regards to processing card and book orders as a result of our moving our office equipment to establish a venue for thorough classroom instructions. While we consider this a good and upward move, we know nothing comes without agitation and we recognize at the same time, things became enmeshed with confusion surrounding other entities intent and happenings. We also recognize that "Divine Law Governs ALL Events". We look forward to your continued interest and activity and we Thank you for your patience with us, Yet, the Universe thanks you More ... Moor. May Peace Abide with you always.
