'Climate Change' Is Real - It is the Will of Nature

This is a time of change, as the universal Mother - Nature reclaims and reshapes the outline of the earth, particularly along the east coast, which is the most heavily populated. Recall the earth quake last year along the east coast starting from Virginia all the way to New York (*Destruction will start in the south*). This occurred on the day the Sun entered Virgo (Virgin-ia), as it relates to the earth. Thereafter her womb (the earth) shook and the waters began to rise. As they were rising there was a mandatory evacuation of Atlantic City (Atlantis).

Currently, the waters have absolutely filled and new birth is emanate. Trees were uprooted, some of which were over 300 years old. The waters soften the earth foundation beneath them and they uprooted to make way for new growth. (*This is for the young and yet unborn*). This storm (named Sandy) occurred under the full moon of Scorpio affirming a cleansing, a resurrecting, regeneration, re-directing, a death of the old and bringing forth a-new. We are to go with nature and its forces, not against it. Thus, we all must invoke from within us regeneration and re-directing, the resurrection of what we know is in us to do. If you are seeing right now, you may have been going through an exorcism, which is absolutely necessary before the baptism in the waters can occur in order to be re-born, regenerate or 'born again'. As long as the earth is beneath your feet, and the sky above serves as your blanket - you are home. **Do not stand in this wake without reverence.**

As for HARP, wherein 'man' tampers with weather, it then becomes the mixture of the 'will of nature' to alter such an un-natural course with devastating results showing who is 'really' in charge. Thus man ought not challenge, alter or attempt to 'fool' Mother Nature.

—R.V. Bey

There REALLY were Sharks in the water, affirmed for North Jersey, Jersey City - Bayonne area, of which some did not make it back to the oceans and died on land. In the Asbury Park Territory many were picking up fish that had come to land and taking them home for food. The shark spotted in Atlantic City (left) was denied by the media when called for verification. It became clear that the 'standard' media DID NOT want to report this to the masses. They said it was photo - shopped. However, with a reasoning mind, of course sharks would be in the water and they would be looking for food in what would appear to be a new territory for them. As well a storm 1000 miles wide is hard for any creature of the sea in the proximity to escape.

Atlantic City and Sandy Storm

No Valet Parking Today

Pacific Avenue - AC (one block from beach)

**Recent work, took at least a year, where Delilah Rd meets Absecon Blvd.
(Rte 30) leading to A.C. bridge, was waste of finance and energy.**

**Inlet with missing boardwalk.
Support boards are all that is left.**
